Portfolio: my-porfolio-delta-liard.vercel.app

PROFESSIONAL SUMMARY

Information Technology professional with hands-on experience in software development, data analysis, mobile application development, database technologies, and digital product development. Experienced in developing web and mobile applications, REST APIs, data-driven solutions, and technology products using JavaScript, TypeScript, Python, Java, React, Node.js, Express.js, and Spring Boot. Practical experience includes data analysis and visualization, API integration, database management, IoT-based applications, software testing, troubleshooting, and technical training. Demonstrated ability to work collaboratively, understand user requirements, and translate real-world challenges into practical technology solutions. Interested in applying technology, data, and problem-solving skills to improve business processes, customer experiences, and digital solutions.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Python, Java, SQL

Web & Mobile: React.js, React Native, Node.js, Express.js, Spring Boot, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Data & Analytics: Python Pandas, Microsoft Excel, Power BI, Data Cleaning, Data Analysis, Data Visualization

Tools: Git, GitHub, Postman, Swagger, VS Code, PyCharm

Other: Agile/Scrum, Software Testing, Debugging, Requirements Analysis, API Integration, Technical Documentation

PROFESSIONAL EXPERIENCE

VisionGuard Ltd, Kigali, Rwanda

Co-Founder, COO & Product Manager | Frontend Developer | June 2026 – Present

- Co-founded and support the operation and development of a technology company focused on practical digital solutions.
- Contribute primarily to the frontend development of E-MBONI, translating product requirements into functional and user-friendly interfaces.
- Serve as Product Manager, contributing to product planning, requirements definition, feature prioritization, and continuous product improvement.
- Serve as COO, supporting team coordination, execution, and operational activities related to product development and implementation.
- Translate user and business needs into practical product features and contribute to decisions regarding usability and implementation.

- Collaborate with team members to identify user needs, technical challenges, and appropriate solutions.
- Participate in testing, debugging, product presentations, and improvements to application usability and reliability.
- E-MBONI won 1st place at the DSE Hackathon and received funding for continued implementation.

Kumva Insights, Kigali, Rwanda

Mobile Developer Intern | 1 month 2 weeks

- Developed a React Native mobile application for real-time temperature and humidity monitoring using Bluetooth Low Energy (BLE) sensors.
- Implemented data synchronization, incident detection, historical reporting, and data visualization features.
- Used SQLite for local data storage and processing within the mobile application.
- Integrated APIs and handled data exchange between application components.
- Investigated and resolved issues involving sensor communication, data synchronization, and application performance.
- Collaborated with the development team to test and improve application reliability and functionality.

kLab Academy, Kigali, Rwanda

Full Stack Developer Trainee | November 2025 – April 2026

- Developed full-stack and mobile applications using React, TypeScript, Node.js, Express.js, and React Native.
- Developed and integrated RESTful APIs to support communication between frontend and backend systems.
- Worked with databases to implement data-driven application functionality.
- Applied Git and GitHub for version control and collaborative development.
- Participated in Agile development, testing, debugging, and code reviews.
- Translated application requirements into functional software features.

SheCanCODE, Kigali, Rwanda

Software Development Trainee – Java Backend | 16-Week Program

- Completed intensive backend software development training using Java and Spring Boot.
- Developed REST APIs and backend services using object-oriented programming and MVC architecture.
- Implemented database integration and structured data management.
- Participated in Agile sprints, testing, debugging, and code reviews.
- Used Git and GitHub for collaborative software development.

Tech-Rise Rwanda

Software Development Trainer | 2024 – February 2026

- Delivered practical software development training to secondary school students.
- Guided learners through programming concepts and hands-on software development projects.
- Supported learners in troubleshooting programming and technical challenges.

- Adapted technical explanations to learners with different levels of technical experience.
- Developed strong communication, mentoring, problem-solving, and technical support skills.

ICT Chamber, Kigali, Rwanda

Data Analysis Trainee | July 2025 – September 2025

- Used Python/Pandas, Microsoft Excel, and Power BI to clean, analyze, and visualize datasets.
- Performed data cleaning and transformation to improve data quality and consistency.
- Conducted exploratory data analysis to identify trends, patterns, and insights.
- Created reports and dashboards to communicate findings and support data-driven decision-making.
- Applied data analysis techniques to practical datasets and project assignments.

EDUCATION

University of Rwanda, Kigali, Rwanda

Bachelor of Information Technology

Completed academic requirements – 2026

Official graduation and degree certificate pending.

SELECTED PROJECT & ACHIEVEMENT

E-MBONI – Digital Technology Solution | VisionGuard Ltd

- Contributed to the development of a technology solution designed to address a real-world problem.
- Participated in product planning, software development, testing, and implementation.
- Worked as part of a three-person team to develop and present the solution.
- 1st Place, DSE Hackathon.
- Received funding for continued implementation.
